

CHECKLIST # G.3 FOR THE VERIFICATION OF: LOW VOC COMPONENTS

The following current laboratory test reports, as applicable from a recognized laboratory.

Adhesives and Sealants:

- ☐ VOC Content as per ASTM D 4457 – Test Method for Analysis of Dichloromethane and 1,1,1, - Trichloromethane in Paints and Coatings by Direct Injection into a Gas Chromatograph.
- ☐ VOC Emission rates as per ASTM D 5116 – Guide for Small-Scale Environmental Chamber Determinations of Organic Emissions from Indoor Materials/Products.

Paints and Coatings:

- ☐ VOC Content as per ASTM D 4457 – Test Method for Analysis of Dichloromethane and 1,1,1, - Trichloromethane in Paints and Coatings by Direct Injection into a Gas Chromatograph.
- ☐ VOC Content for waterborne air-dry coatings as per ASTM D 6886 – Test Method for Speciation of the Volatile Organic Compounds (VOCs) in Low VOC Content Waterborne Air-Dry Coatings by Gas Chromatography.
- ☐ VOC Emission rates as per ASTM D 5116 – Guide for Small-Scale Environmental Chamber Determinations of Organic Emissions from Indoor Materials/Products.
